

Science & Cycling 2022 Conference Program

version 1.5 8 June 2022

Tuesday 28 June		
		Lounge
08.00	18.00	Registration Open
		Lounge
09.00	18.00	Exhibition
		Bio 1
09.00	09.05	Welcome
09.05	09.15	Opening
09.15	09.40	Marije Elferink-Gemser Gearing up to the World Tour level - More than 'just' power output
09.40	10.00	Forum Talent Development: Marije Elferink-Gemser, John Wakefield, Jacques Landry
10.00	10.30	Stephen Barrett When to Hop and When to Jump: Steps Taken in the Development Pathway
		Lounge
10.30	10.50	Coffee break
10.50	11.20	Jeroen Swart Return from severe injury. How long does it take to return to play at the highest level.
11.20	11.50	Dajo Sanders Profiling riders and races to inform training practice
11.50	12.20	Anders Piper The invisible aspect
		Lounge/Restaurant
12.20	13.20	Lunch
12.20	13.20	Company demonstration in exhibition area / poster visits
		Bio 1
13.20	13.50	Lars Nybo Preparing for the TDF – go high or go hot ?
13.50	14.20	Carsten Lundby
14.20	14.40	Kevin Caen W' recovery during intermittent exercise: current limitations and future challenges of predictive models
14.40	15.00	Gerrit Glomser Differences in physiological variables of U23 cyclists between normoxia and hypoxia
15.00	15.20	
		Eventsalen
14.20	14.40	Ernst Hansen Freely chosen cadence is increased across repeated bouts of submaximal ergometer cycling
14.40	15.00	Kurt Bergin-Taylor Field-based testing to determine power-cadence and torque-cadence profiles in professional road cyclists
15.00	15.20	Sebastien Duc Effect of pedaling cadence on physiological responses and neuromuscular fatigue during a single interval-training session
		Lounge
15.20	15.40	Coffee break

Bio 1			
15.40	16.40	Stephen Seiler a.o.	Information Flow to support Decisions and Development in Professional Cycling
16.40	17.00	Jelle de Bock	Real-time energy monitoring of track cyclists
17.00	17.30	Arno Knobbe	Day-to-day fitness assessment in cycling, based on a power/heart rate model
Eventsalen			
16.40	17.00	Thomas Fallon	The Knowledge and Attitudes of UCI Competitive Cyclists towards Sports Related Concussion
17.00	17.20	Howard Hurst	Perceptions of cycling helmet safety in relation to sports-related concussion mitigation amongst competitive cyclists
17.20	17.40		
19.00	22.30	Conference evening	

Location tbc

Wednesday 29 June

Bio 1			
09.00	09.30	James Hull	Breathing problems in cyclists: getting it right, first time
09.30	09.50	Christoph Triska	Bypass of Respiratory Complex I and its relation to different lactate landmarks – a pilot study
09.50	10.10	Callum O'Malley	Inter- and intra-individual reliability of a 30-minute RPE clamp cycling exercise
10.10	10.30	James Spragg	Predicting power outputs in a fatigued state: A pilot study
10.30	10.50	Peter Leo	The Compound Score in elite road cycling
Eventsalen			
09.30	09.50	Jamie Pringle	The ergonomics of aerodynamics: solving the positional optimisation puzzle for both biomechanical function and aerodynamic performance
09.50	10.10	Claes Hoegh Cubel	How low can you go – exploring the balance between aerodynamic advantages and restrictions related to reducing the torso-hip angle
10.10	10.30	Georges Soto-Romero	Aerodynamic Drag Between Two Cyclists: Effect of Wheel Rotation
10.30	10.50	Robert Stanley	Position for the Sprint: A performance analysis of intermediate sprints in the Men's Elite Omnium Points Race
Lounge			
10.50	11.10	Coffee break	
Bio 1			
11.10	11.40	Jeroen Swart	Polarised or pyramidal approach to training prescription: What is the evidence and what do we see in practice?
11.40	12.10	Forum Training Methods: Jeroen Swart, Jamie Pringle, Dajo Sanders	
12.10	12.30		
Lounge/Restaurant			
12.30	13.40	Lunch	
Bio 1			
13.40	14.10	Wendy Holliday	Bike fit: applying the research to the clinic
14.10	14.30	Andy Brooke	Are we closer to understanding the role of the ankle in pedaling?
14.30	14.50	Jon Irriberri	Biomechanical follow up in elite road cycling

14.50	15.10	Felix Imbery	Torque behaviour during cycling sprints from different pedalling frequencies
15.10	15.30	Remi Aubert	Understanding frictions: Methodological guidelines for measuring transmission efficiency
Eventsalen			
14.10	14.30	Jamie Blanchfield	Adolescence to Adulthood, Managing The Key Transitions in Developing Cyclist's Sporting Careers: The Athlete's Perspective
14.30	14.50	Nicki Almquist	Maximal aerobic power-cadence relationship estimation in national level under nineteen cyclists from in-situ data
14.50	15.10	Yann Bertron	Development of cycling performance and performance-related measures in female and male national-level cyclists: From junior to senior level
15.10	15.30	Cedric Lemaitre	Estimation of the drag force: a neuronal approach
Lounge			
15.30	15.50	Coffee break	
Bio 1			
15.50	16.20	Sebastian Weber	Glycolytic Power in Cycling - a brief history of VLamax
16.20	16.50	Robert Lamberts	Measuring sleep, recovery and mental well-being in elite female cyclists; can it be done based on a questionnaire ?!?
18.15			Tour de France Teampresentationaround Tivoli Gardens.

Chairman

Robert Lamberts

Jamie Pringle

Wendy Schroder

Stephen Seiler

Christophe Triska
